

# Genesis Touch® 3.8

## Remote Patient Monitor

The Genesis Touch® tablet is an essential component of our complete LifeStream remote patient monitoring solution. Genesis Touch software is installed on a tablet, for touchscreen interaction with patients, and quick deployment to patient homes from a variety of rural or urban locations. The tablet uses cellular and Wi-Fi communications, to keep care providers connected with patients through LifeStream clinical monitoring software.

Resideo Life Care Solutions rigorously tests and develops Genesis Touch software for a variety of Android™-based Samsung tablets, with a specially designed patient interface that is easy to use, and locked to control the patient experience, eliminate distraction and keep patients focused on healthy outcomes.

With the release of Genesis Touch v3.8, our remote patient monitor receives a new look and feel, with improved menu designs for accessibility. Plus, compatibility with more Bluetooth™ LE peripherals helps address more patient needs. Learn more:

### What's New in Genesis Touch® 3.8?

#### User Interface Improvements

We've redesigned the look and feel of the Genesis Touch v3.8 to make it easier for patients to use, while ensuring user workflow consistency. All warrantied tablets receive the new user interface via a free over-the-air software upgrade. New monitor orders also qualify for a factory installation of Mobile Device Manager, for greater systems control and auto-update enhancements.

Improvements include:

- Updated fonts and increased text size for better visibility
- Clean white background for greater contrast, meeting accessibility guidelines
- Larger menu buttons and navigation with text labels
- Refreshed icons and color-coded assignments for each type of measurement, including blood glucose, weight and much more.
- Enhanced home screen arrangement, and labels, to encourage a positive first engagement.
- Idle screen customization, enabling the monitor to display a serene image, while displaying current time and next scheduled monitoring session.

#### More Peripherals for More Patient Needs

A Welch Allyn blood pressure monitor, Welch Allyn weight scale and a Nonin pulse oximeter are included with our monitoring kits. The Genesis Touch v3.8 is also compatible with next-generation A&D Bluetooth™ LE peripheral medical devices, for customers with a preference for A&D peripherals:

- A&D UA-651BLE Blood Pressure Monitor
- A&D UC-352BLE Weight Scale

With a presence in 150 million homes, Resideo is on the forefront of the next wave in consumer technology: the smart, connected home. Our updated Resideo Life Care Solutions remote patient tablet incorporates years of clinical feedback and user-testing, paired with a clean contemporary design, to provide a simple, secure, health monitoring experience for a wider variety of patients.

# Genesis Touch® 3.8

## The Life Care Solutions Genesis Touch® FDA class II personal health device offers:

- A tested and controlled patient interface that protects against viruses and patient tampering.
- New Samsung Galaxy Tab A orders\* include factory-installed Mobile Device Manager services for automatic Genesis Touch software updates and Android Operating System control.
- Extended software upgrade support, with Genesis Touch software compatibility on multiple Android™ Operating Systems, including Android™ 8.1, on the Samsung Galaxy Tab A (8.0).
- Cellular connectivity with every monitor, offering peace of mind when transmitting vital sign measurements from hard-to-reach rural areas.
- Optional Wi-Fi connectivity for Video Visits with patients and care providers using LifeStream.
- Native integration with our LifeStream platform for access to all of the latest features.
- Canadian-French and Spanish language support for patients and care providers.

## Integrated Video Improves Quality of Care and Enables Patient Interaction

- Enable patients to easily join a video visit with their care providers and family members.
- Support for small group education sessions with a clinician using LifeStream.
- Improve patient interaction while providing lower-cost access to patients in hard-to-reach areas through a 4G cellular service or Wi-Fi connectivity.

## An Emphasis on Education

- Assign video education modules and comprehension questions directly from LifeStream.
- Replay video education on demand, not only during scheduled monitoring time.
- Set video comprehension questions and monitor completion of assigned modules in LifeStream.
- Combine with video visits for face-to-face educational opportunities or group sessions.

## SPECIFICATIONS\*

Leverage an Samsung Galaxy Tab® A 8.0, powered by Android™, Verizon Wireless 4G cellular LTE™, integrated Video Visit capability and Wi-Fi with Factory-Installed Verizon MDM Services

## A VARIETY OF PERIPHERAL MEDICAL DEVICES\*

Reduce installation times with wireless Bluetooth® peripherals with no physical wiring.
